Subject: Proposal - Voice-Based AI Acquisition Opportunity: WassUpp / IAM

Dear [Recipient's Name],

I am reaching out to present an exclusive opportunity to acquire or partner on a fully developed AI concept that represents the next generation of emotional, voice-first personal AI: WassUpp, featuring IAM.

WassUpp is a mobile application built around a simple but powerful idea - giving every user a single AI voice companion that never changes, always remembers, and builds a unique, emotional connection over time. Its core system, IAM, is not just a chatbot or assistant - it's a persistent digital voice presence. IAM remembers your stories, habits, emotions, and voice preferences. It becomes your voice ally, not a search tool.

This is not theoretical - the concept, branding, voice system logic, and full technical structure have already been built.
Ownership is verified and timestamped publicly here:
https://archive.org/details/wass-upp-iam-timestamp-publication-published

I am open to partnership, funding, or full acquisition under the right terms.

Highlights:

- Fully protected intellectual property (timestamped + legal structure ready)
- Registered domains: wassupp.app / wassupp.us / wassupp.net
- Brand identity and companion name ("IAM") ready for launch
- Monetization strategy, pitch decks, and development specs prepared
- No third-party API dependency: full autonomy vision for AI memory and personality

I would be happy to schedule a private presentation or provide access to the full package upon interest.

Looking forward to your feedback and hoping to discuss how WassUpp could fit within your product ecosystem.

Sincerely,

Julien Jakubowski
